Table 1 Categorization of the selected publications. Publications were selected based on the occurrence of the term "military" in the abstract or title or when they were cited at least 20 times (according to Zotero's CrossRef citation manager). The assigned attributes are intended to reflect the main focus of the individual contribution; it is thus a non-exhaustive overview.

Ref.	Appl. context			Technology									Tasks	Goals
	general-purpose	Safety-critical	military	AR/VR	AI	robot	UAV	game	data set	map	other	undefined		
[1]	✓							✓			✓		training	accuracy
[2]		✓		✓									training	immersion
[3]	✓			✓									close-by assistance	SA
[4]	✓				✓	✓							object recognition, detection, delivery	trust, explainability, autonomy
[5]	✓			✓									training	immersion, UX
[6]		✓					✓						surveillance, target selection	accuracy
[7]	✓				✓								communication	accuracy
[8]		✓							✓				surveillance, detection	accuracy, speed, robustness
